4	CONCLUSION	8

INTRODUCTION

The JavaScript Grade Calculator is a simple web project created using HTML, CSS, and JavaScript. It takes the student's marks as input and calculates the total, average, percentage, grade, and pass or fail status. HTML is used for the structure, CSS is used for basic styling, and JavaScript is used for the calculations.

INPUT CODE

```
<html>
<head>
  <title>JavaScript Grade Calculator</title>
  <style>
    h1 {
      text-align: center;
    }

    h2 {
      text-align: center;
    }

    div {
      width: 500px;
      margin: 30px auto;
      padding: 20px;
      border: 2px solid black;
      text-align: center;
    }

    input {
      padding: 5px;
    }

    button {
      padding: 5px 15px;
    }
    #name{
      margin-left: 20px;
    }
    #rollno{
      margin-left: 5px;
    }
    #class{
      margin-left: 50px;
    }
  </style>
</head>

<body>

  <div>
```

```

<h1>JavaScript Grade Calculator</h1>

<h2>Student Information</h2>

Result

CONCLUSION

In conclusion, this project helps to calculate a student's result easily using JavaScript. It helped me learn how to take input from a webpage, perform calculations, use if-else conditions, and display the result on the webpage.
